How to wire the MicroHam MK2R into the KK1L 2x6 Switch/Band Decoder

K1XM AUX 1

K1XM AUX 2

DB25 pins X 6 7 8 9

DB25 pins X 10 11 12 13

X = DB25 Shell (ground)
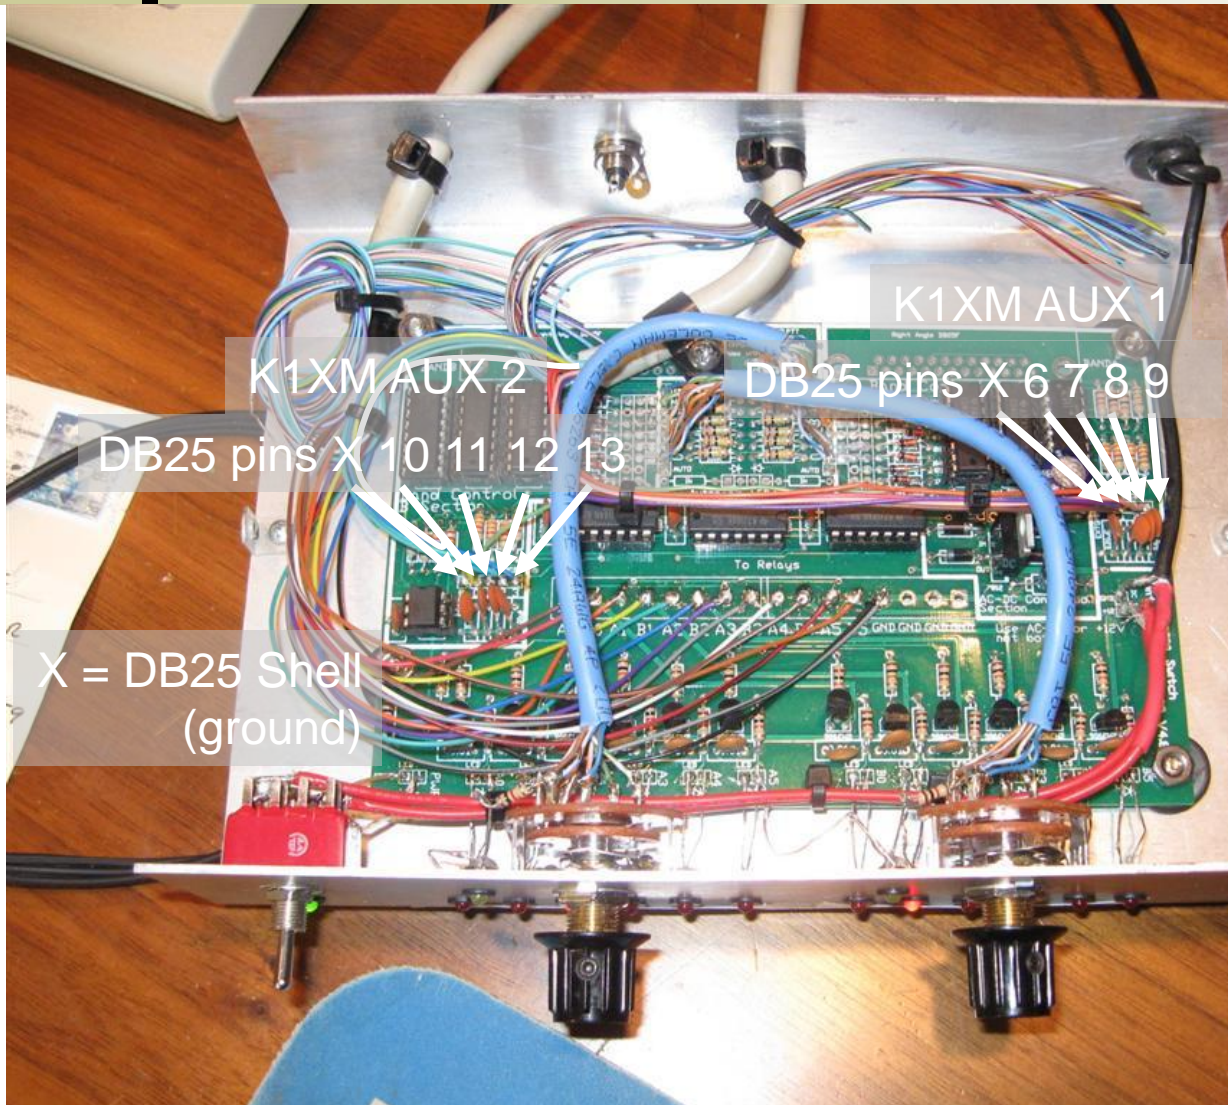

- Cut off the end of a DB25 cable
  - I used an old Centronix printer cable
- Use an ohm meter to trace the wires to the correct position on the DB25

- **NOTE:** MicroHam radio port needs to be configured to output radio band data
